for two pianos and two ring modulators

PERFORMANCE INSTRUCTIONS

Each performer must manipulate a custom made ring modulation especially made for this piece, inspired in the MODUL 69B ring modulators fabricated by the Lawo company for the performance of Mantra by Karlheinz Stockhausen. The ring modulator contains 12 presets, each for each movement, that determine a particular modulation frequency for each piano. Each pianist can select the corresponding preset using the knob at the center of the modulators before each movement. The modulators receive two line inputs from two dynamic microphones directed towards the body of the instrument. The modulation frequencies and their corresponding pitch should be set up according to this table:

Movement	Mod. freq Piano 1	Mod. freq Piano 2
1	2959.96 Hz (F#7)	369.99 Hz (F#4)
2	4186.01 Hz (C8)	3951.07 Hz (B7)
3	261.63 Hz (C4)	2093.00 Hz (C7)
4	8.176 Hz (C-1)	9.177 Hz (D-1)
5	97.99 Hz (G2)	2793.83 Hz (F7)
6	3250.00 Hz (A7)	3729.31 Hz (A#7)
7	523.25 Hz (C5)	2271.46 Hz (C#7)
8	30.87 Hz (B0)	25.96 Hz (G#0)
9	16.35 Hz (C0)	4186.01 Hz (C8)
10	880.00 Hz (A5)	830.6 Hz (G#5)
11	8732.02 Hz (C9)	8732.02 Hz (C9)
12	2959.96 Hz (F#7)	587.3 Hz (D5)

In case the custom devices are not available for the performance, a MaxMSP or equivalent patch can be implemented using these modulation frequencies for each piano.

The composition of this piece and the design and fabrication of the ring modulators was made possible by a ArteCih grant from Dirección de Artes y Cultura, Vicerrectoría de Investigación, Pontificia Universidad Católica de Chile.
